

SINGAPORE
10 - 11 JUNE 2026

2026 Event Report

supera.ai

"We've got an incredible audience here of builders from around the region, not just technologists, but enterprise leaders, foundation model companies, AI native startups, big cloud companies. So it's an incredible audience that I think represents not just industry, but our community."

Andy Hock
Cerebras Systems, CSO and SVP

"I think SuperAI is perhaps the best AI conference in the world because it does bridge East and West in a way that's often not done. So the global nature, the international nature of SuperAI is, I think, what makes it very important."

Balaji Srinivasan
The Network State, Founder

"I think it's really useful to pull AI out of the Silicon Valley bubble and help everyone else understand what this is, how this works, how it gets diffused, how it gets deployed."

Benedict Evans
Analyst

SuperAI 2026: A look inside

- 01 Asia's Largest AI Event
- 02 Where Brands Meet the AI Industry
- 03 Attendee Profile
- 04 From the Frontiers of AI Innovation
- 05 Singapore's SuperAI Ecosystem

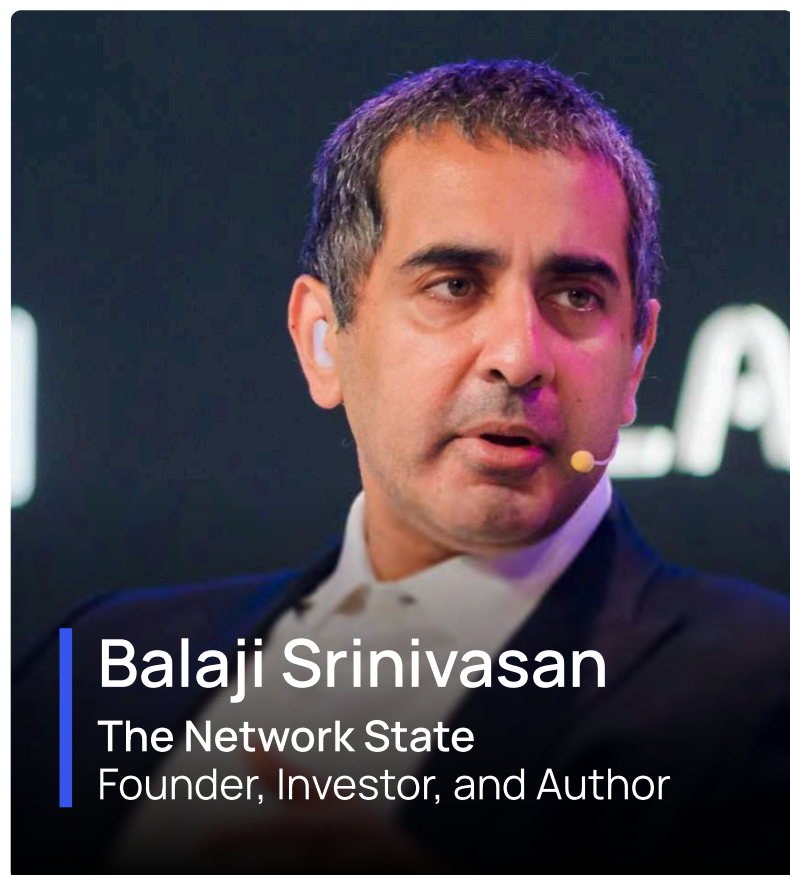

01 Asia's Largest AI Event

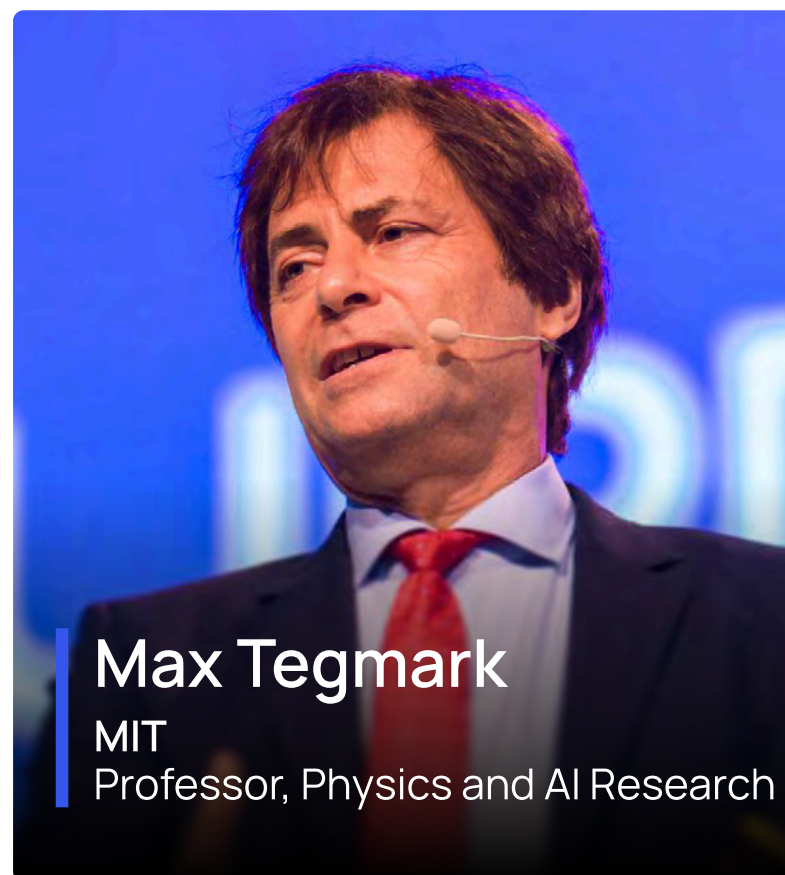

From 10-11 June 2026, SuperAI transformed Marina Bay Sands into the epicentre of artificial intelligence: a sold-out summit uniting 10,000+ innovators from over 150+ countries.

The leaders of the industry took the stage at SuperAI 2026

With 100+ headline speakers, SuperAI 2026 brought the entire AI stack onto one stage, from the silicon up. The chipmakers building the compute, the frontier labs defining what models can do, the clouds running them at scale, and the companies turning all of it into products people actually use. East and West, frontier and production, in the same room.

Attended by industry leaders

Over 1,500 AI companies gathered at Singapore’s iconic Marina Bay Sands to showcase their innovations.

A look inside Asia's largest AI event

10,000+
Attendees

150+
Countries

1,500+
AI Companies

Over two days, the people building frontier, AI researchers, chipmakers, model labs, and the infrastructure and capital behind them, met the operators putting it into production. Product launches, first deals, first introductions. SuperAI is where that happens, and it happens in Singapore: the point where East and West, frontier and production, actually meet.

02 Where Brands Meet the AI Industry

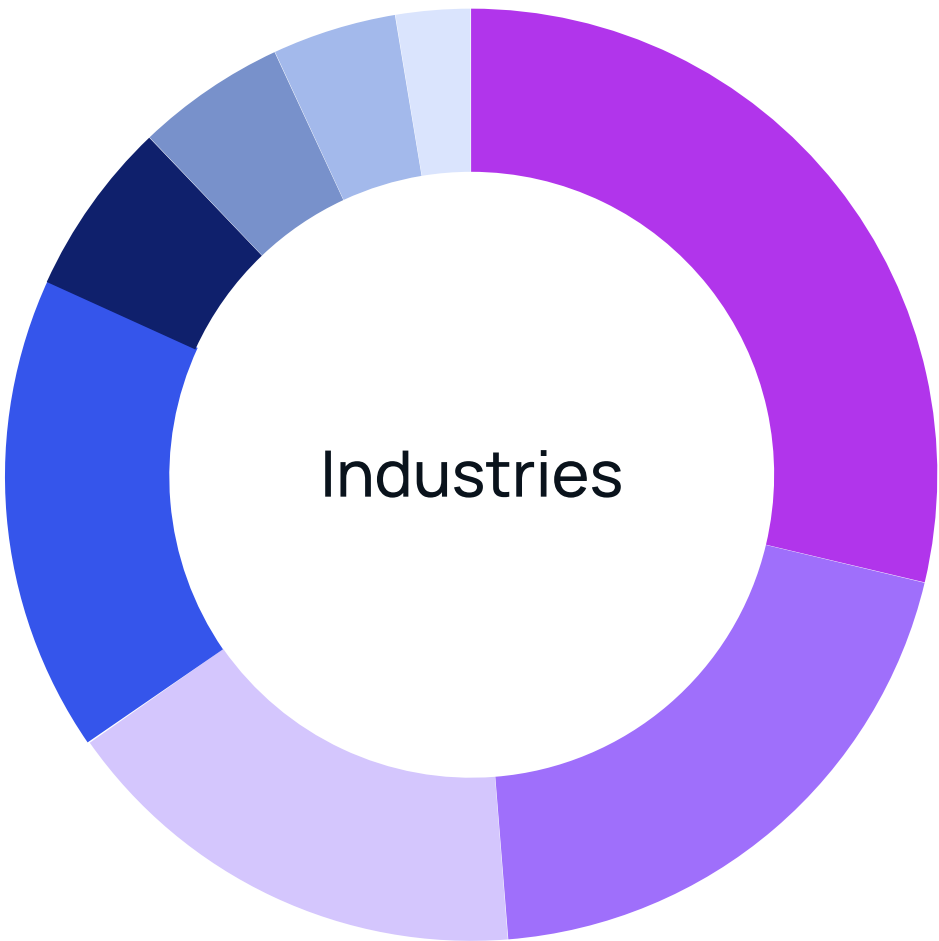

From main-stage moments to the conversations that happen over coffee, SuperAI is where the AI industry's most important companies get seen, get discovered, and get in the room.

The brands in the room

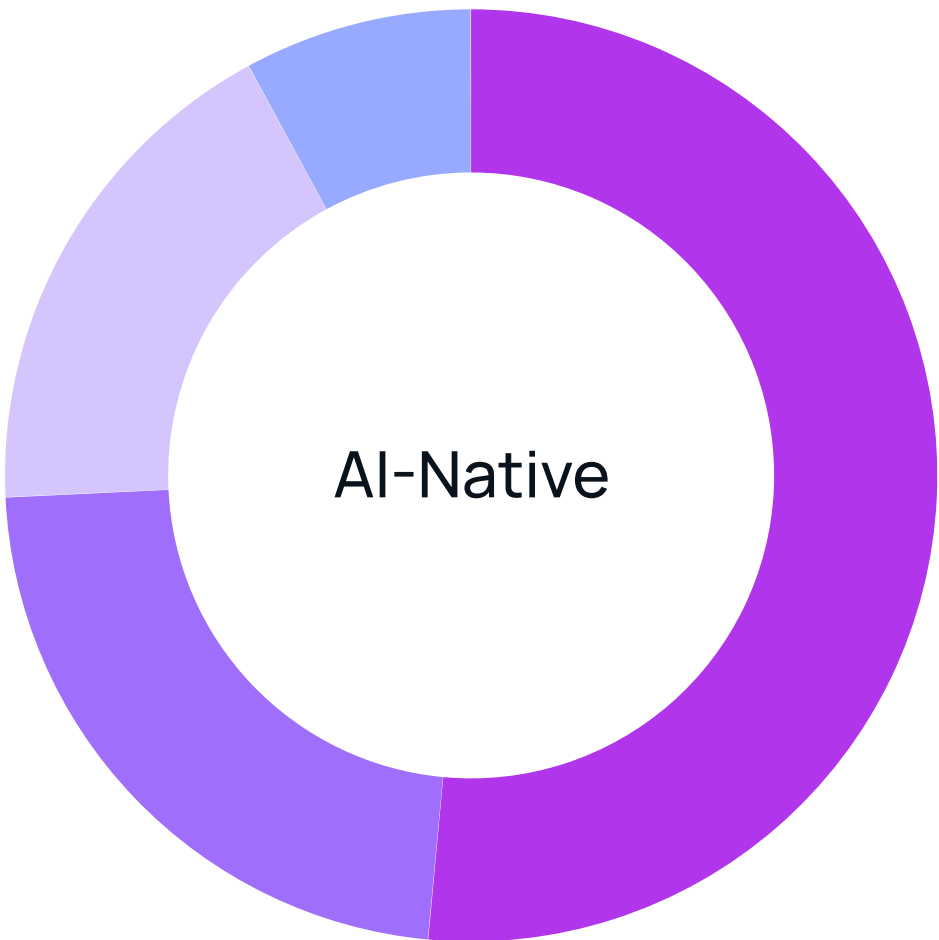

The world's leading AI and technology companies build their presence around SuperAI. In 2026, 133 partners including Arm, Stripe, Nebius and Plaud put their brands in front of 10,000+ industry participants from over 150+ countries.

The AI stack, in one room

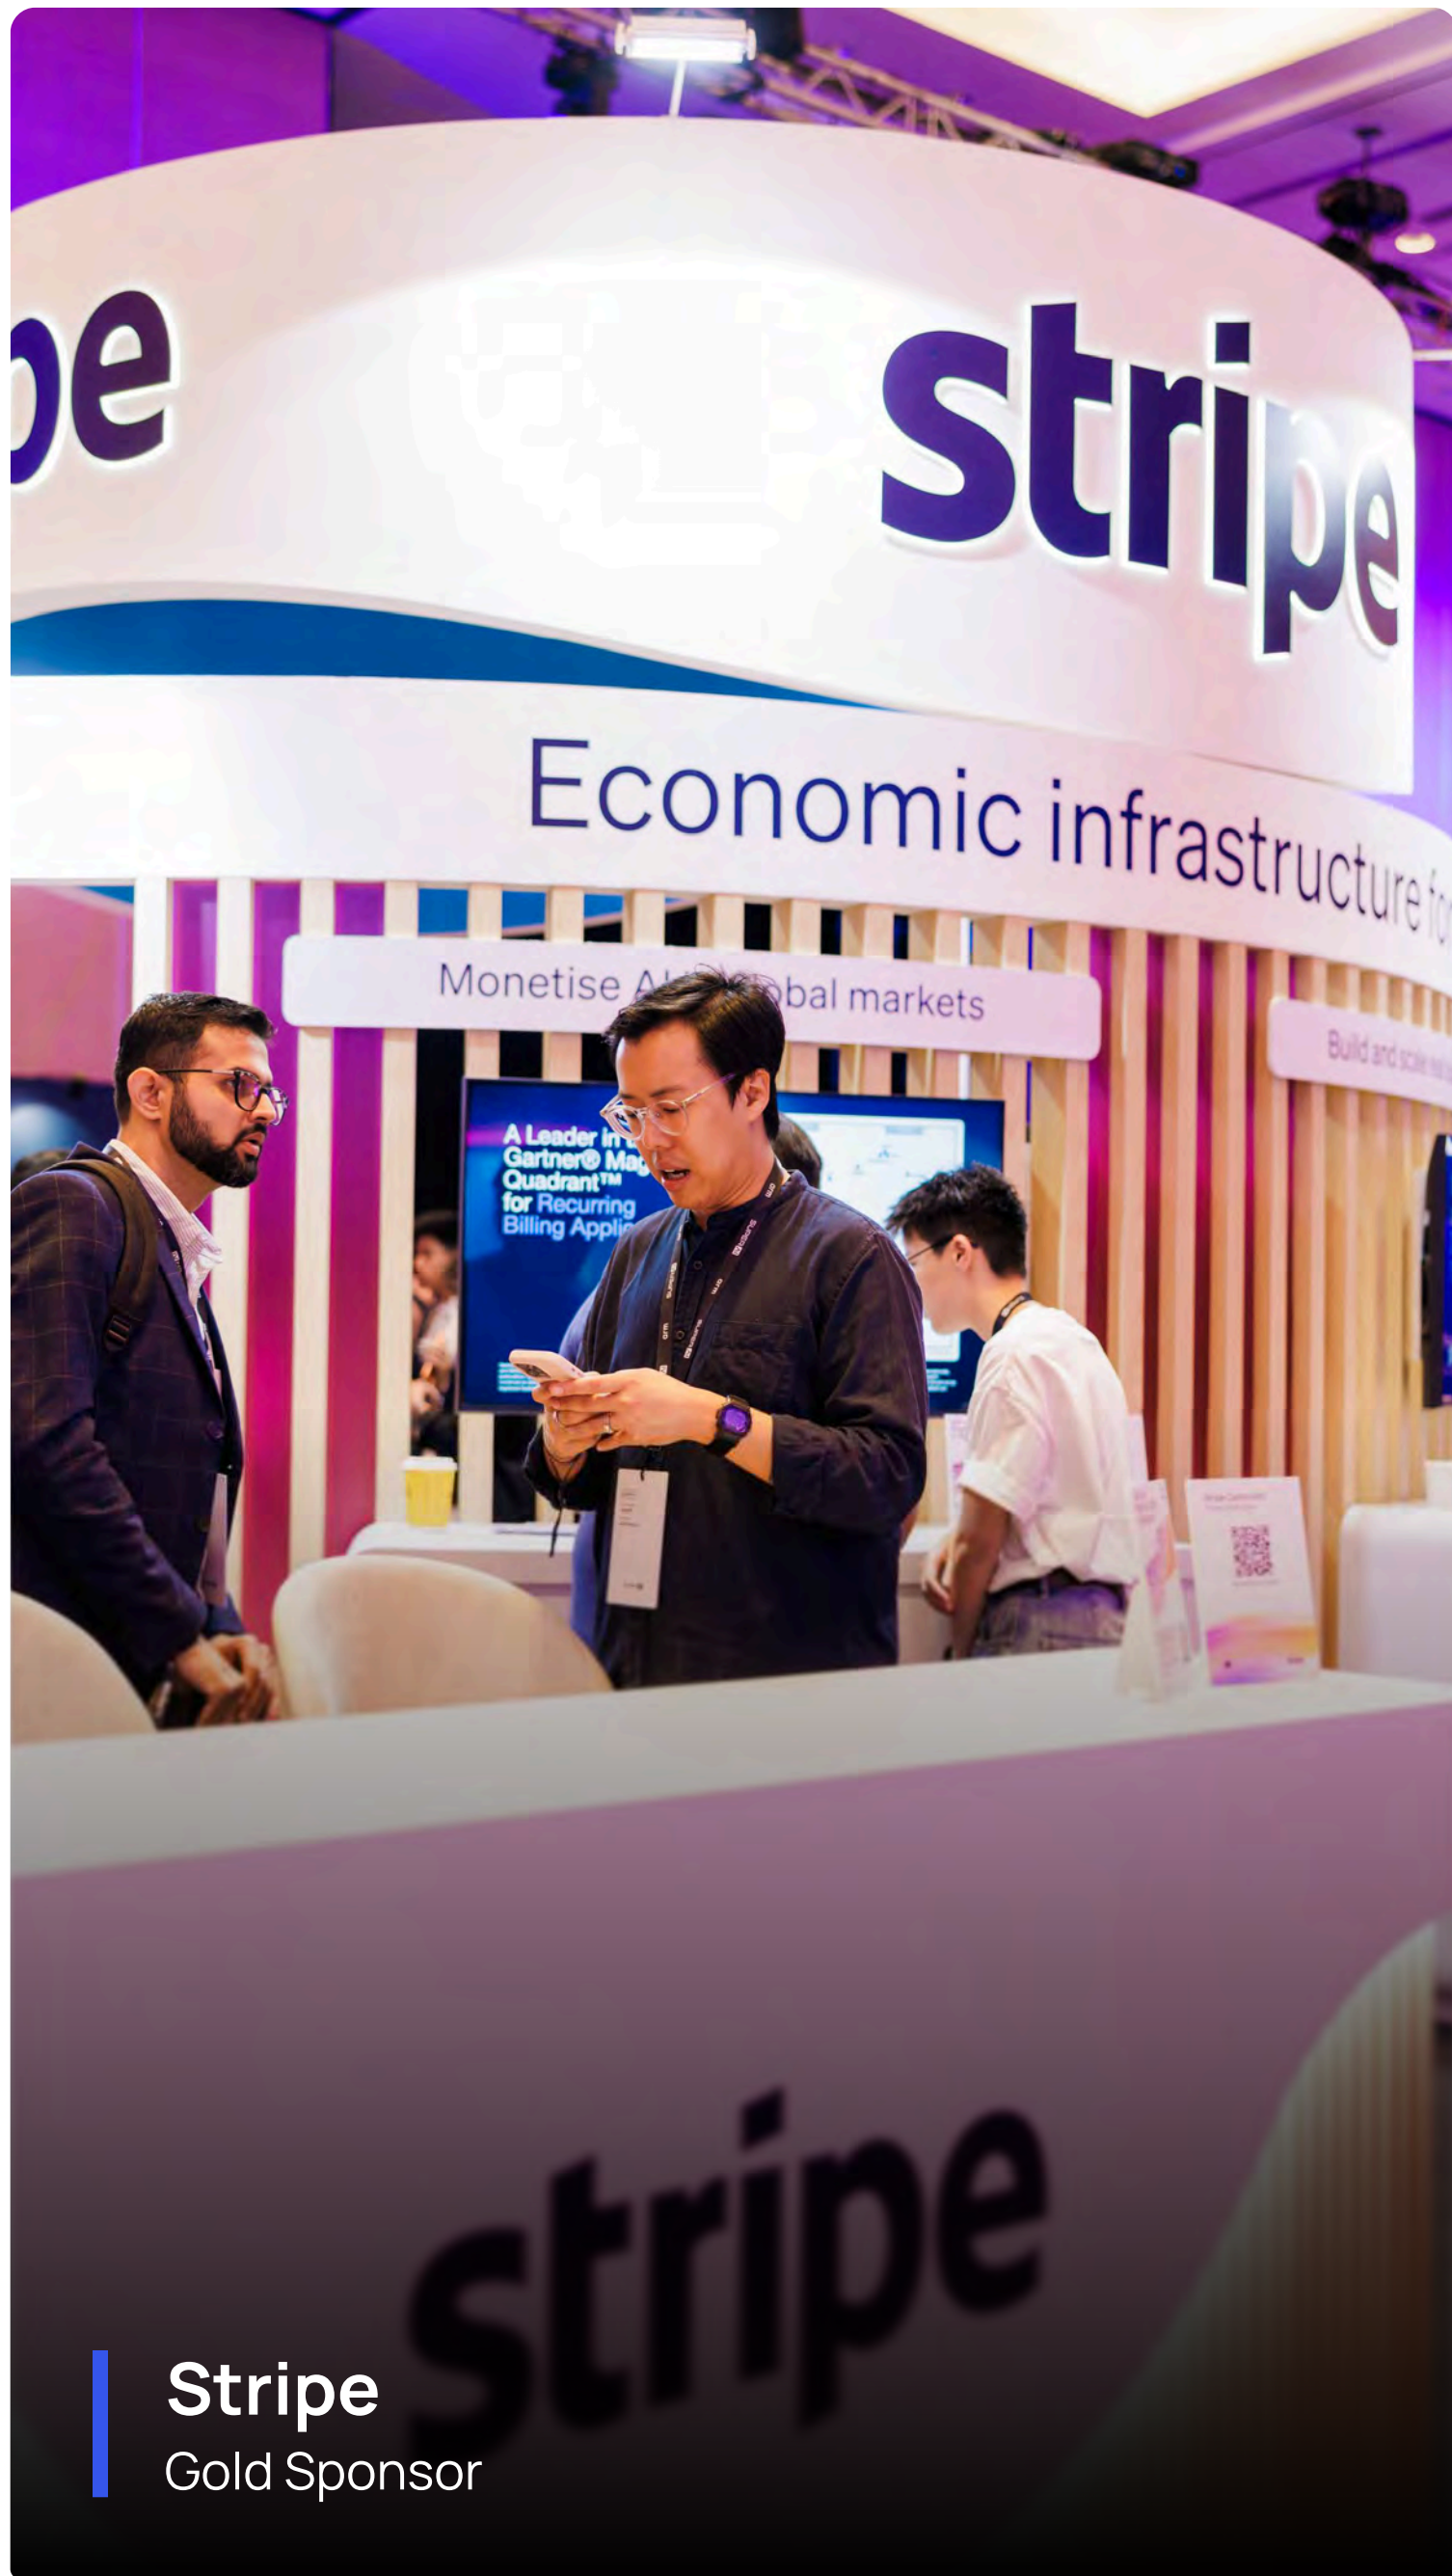

28.7%	AI Applications (Vertical and Consumer)
20.3%	AI Infrastructure, Compute, Chips and Cloud
16.5%	Dev Tools, Data Platforms and Data
16.5%	Fintech & Financial Services
6.1%	Media, Knowledge and Consulting
5.2%	Enterprise SaaS and Productivity
4.1%	Marketing / Martech
2.6%	Frontier Labs and AI Agents

51.0%	AI applications
23.0%	AI infrastructure & compute
18.0%	AI dev tools & platforms
8.0%	Foundation models & agents

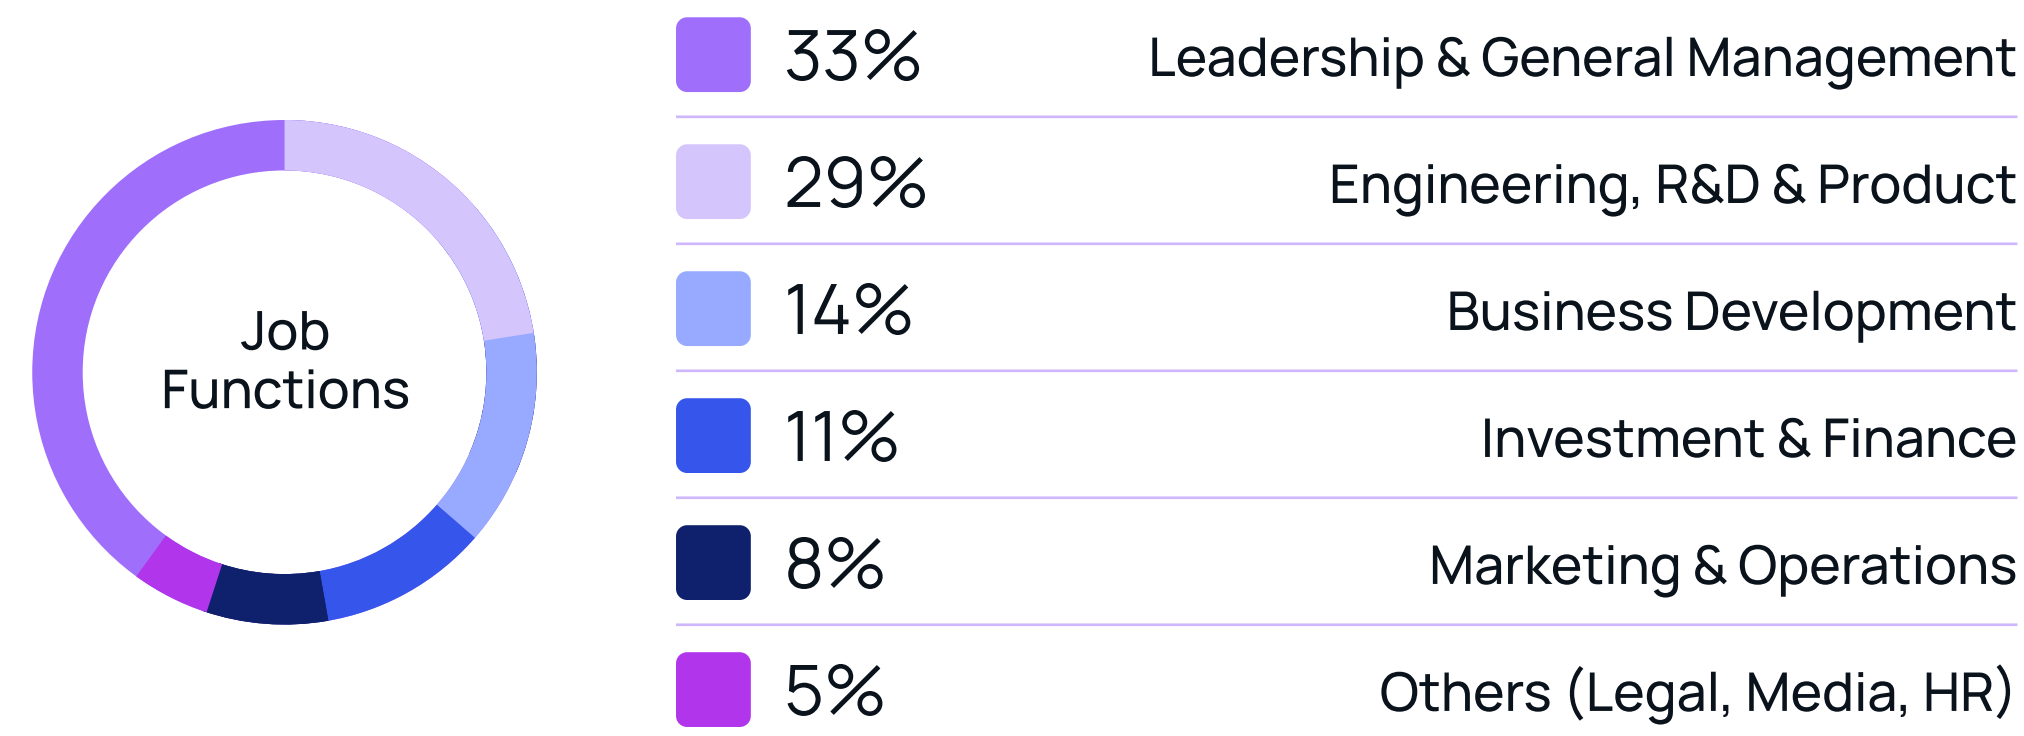

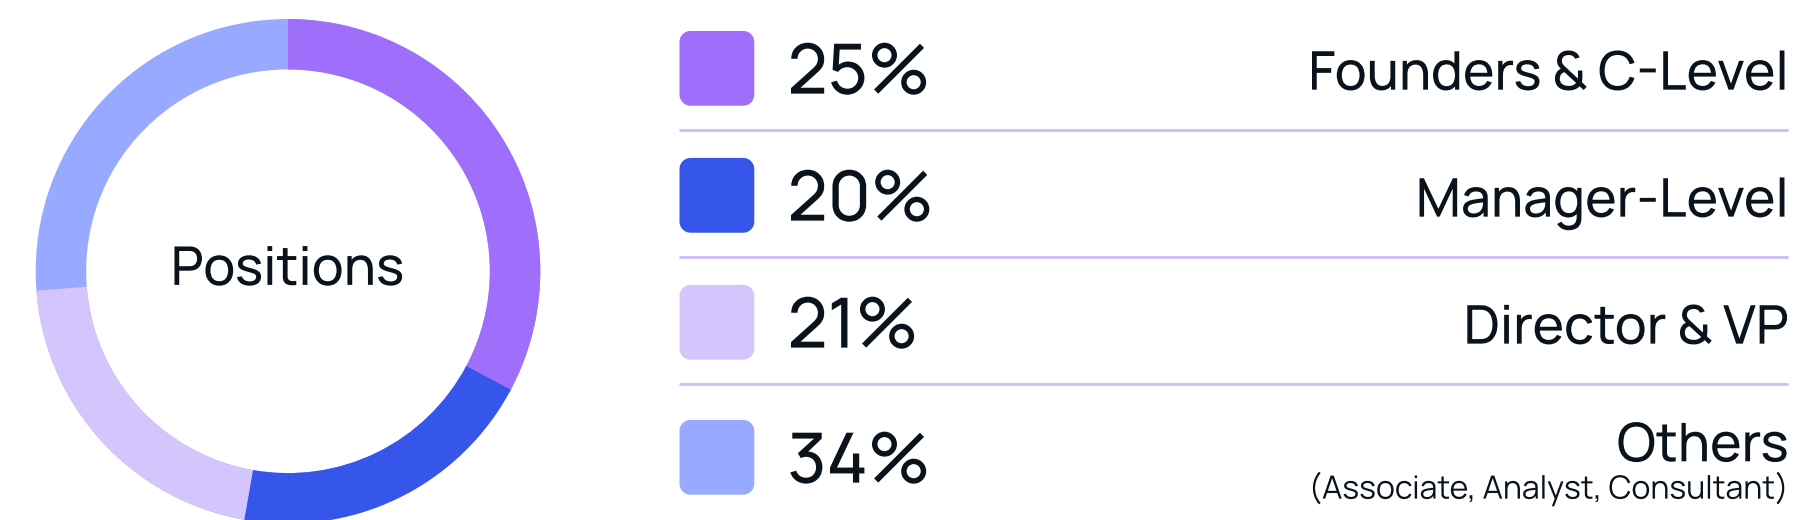

03 Attendee Profile

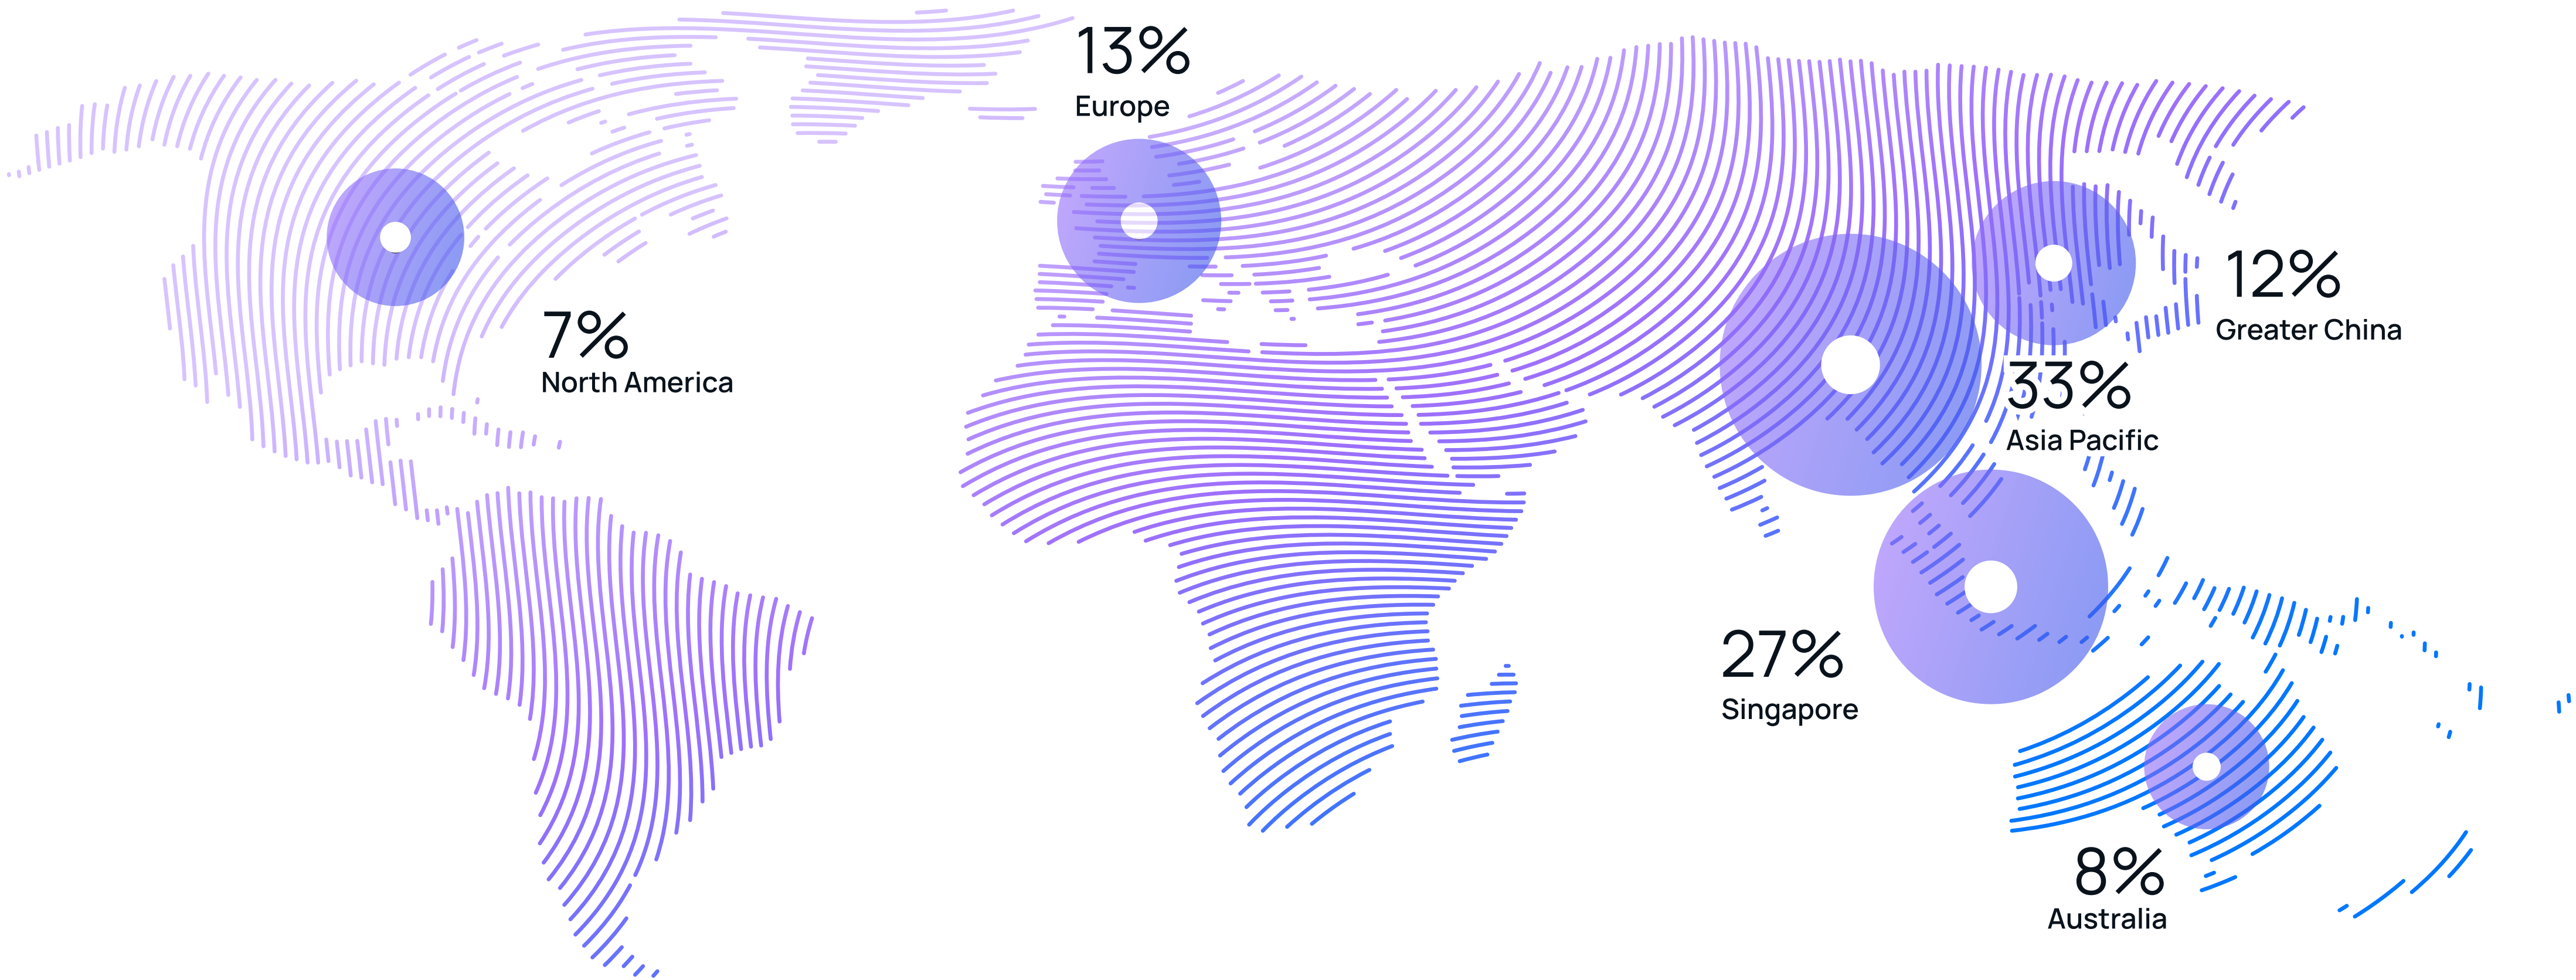

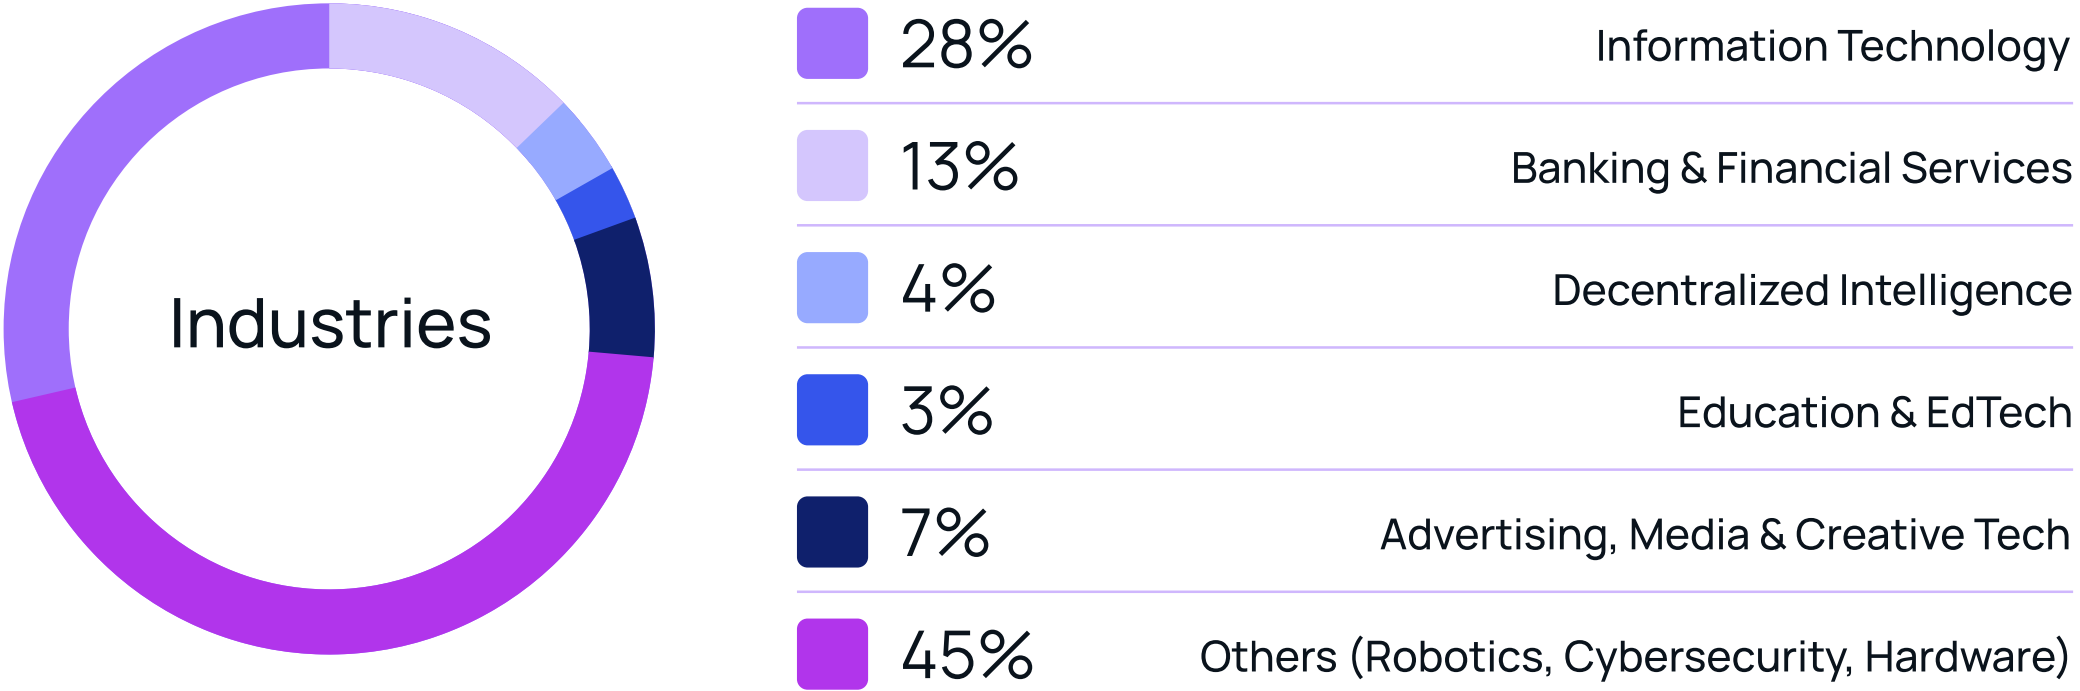

The room tells the story. SuperAI 2026 drew the people who decide, build, and fund AI - senior leaders, technical founders, and investors from the full stack of the industry.

Positions and Job Functions

East meets West

AI's two largest ecosystems rarely share a stage. At SuperAI they share a city. East and West, frontier labs, capital, and operators, converged in Singapore.

Unparalleled Networking

With over 1,500+ leading AI companies under one roof, SuperAI turned hallway conversations into signed partnerships. From casual meetups to curated 1:1s through our B2B Matchmaking, plus dedicated 1:1 Investor Hours pairing startups directly with the investors backing them - conversations led to real outcomes.

Will Bryk
Exa, CEO

"If you're someone watching this and you're thinking about whether you wanna come to the next SuperAI conference, you should definitely come because it's just a fantastic place to meet all sorts of people across the world who are thinking about the most important problem of our time."

04 From the Frontiers of AI Innovation

The frontier isn't a keynote, it's a working product. This is where the next generation of AI gets built.

All eyes on SuperAI

SuperAI captured attention worldwide with breaking headlines and live broadcasts. Attended by top-tier media, the event became a focal point for international coverage, underscoring its standing as the preeminent source for developments in the Artificial Intelligence industry.

HACKATHON 9-11 JUNE 2026

36
Hours

200
Participants

\$200k
Prize Pool

**Unveiling the world's sharpest
AI developers.**

The SuperAI **NEXT** Hackathon returned for 2026 with the stakes raised: a \$200,000 prize pool — four times last year's. 200 of the sharpest AI and ML engineers were selected to go from idea to working product in a 36-hour sprint at the heart of SuperAI. Two sleepless nights, mentor check-ins, technical workshops, and round-the-clock fuel.

Powered by AWS, Vercel, Stripe, Exa, and Razer — with engineers from each on the floor giving hands-on guidance. 5 winning teams showcased their work live on Day 2 in front of 10,000+ SuperAI attendees.

SUPER AI GENESIS
STARTUP COMPETITION 10-11 JUNE 2026

Now the largest AI pitching competition in the world, **Genesis** drew its strongest cohort yet: 50 teams selected from hundreds of applications across more than 40 countries, building everything from frontier models and AI infrastructure to embodied AI and vertical agents.

Powered by Microsoft for Startups and OpenAI, Genesis 2026 carried a \$2.3M prize pool; 10 finalists pitched shark-tank style on 10-11 June, judged by operators and investors from across the global AI ecosystem alongside partners from Vertex Ventures, Hustle Fund, 3one4 Capital, AppWorks, iGlobe Partners, SparkLabs Taiwan.

"What brings me to SuperAI is really it's the community. It's the network of people who are building, whether it's hardware, new software methodologies or new applications to try to make sense around how AI is really going to impact our daily lives, our companies and our governments all across Asia Pacific."

Replit × SuperAI: Vibe Coding Your First App

Singapore, December 2, 2025

05 Singapore's SuperAI ecosystem

SuperAI doesn't end at the venue. It anchors a city-wide week and a global community that gathers before the doors even open.

Road to SuperAI

The momentum didn't start in Singapore. In the months before the conference, Road to SuperAI took the event across five cities. Each hosted with local partners, building the community in person before the doors opened:

- **Singapore:** Replit, Stanford HAI, ClawSG, Carta, INSEAD
- **Taipei:** OpenAI, Qualcomm, AppWorks, SparkLabs Taiwan, Agora, Startup Island Taiwan
- **Tokyo:** Plug and Play, Bright Data
- **Shanghai:** 01.AI, StepFun, Google, Xnode, WAVE
- **San Francisco:** AI+ Renaissance

From San Francisco to Shanghai, Road to SuperAI made the case in person, East and West, that the year's most important AI gathering happens in Singapore.

SINGAPORE AI WEEK

8 - 14 JUNE 2026 • SINGAPORE

100+ events. One city.
Asia's AI industry in motion.

SuperAI Singapore 2026 sat at the heart of Singapore AI Week (8–14 June 2026): a city-wide series of more than 100 satellite events spanning workshops, hackathons, founder dinners, investor roundtables, demo days, and networking mixers in venues across the City State.

Hosted independently by organisations including OpenAI, Lightspeed, Liminal, Notion, Alibaba Cloud, HSBC, Stripe, Vercel, and Carta, the week carried the energy of SuperAI across the city – and established itself as the main industry gathering of the year for AI across Asia.

Four Questions Before You Deploy

1. What can it access? (messages, web, files, databases, ...)
2. Who reviews the code? (skills, MCPs, internal API access)
3. What's the fallback plan?
4. What are the data privacy & compliance requirements?
